PROFESSIONAL SUMMARY

Cybersecurity and IT professional with experience across identity and access management, GRC, enterprise application administration, IT operations and secure software delivery. Combines hands-on SAP Business One administration and user lifecycle support with applied cybersecurity research in Policy-as-Code segregation-of-duties enforcement.

CORE CAPABILITIES

Identity and Access Management | Access Control | Segregation of Duties | GRC | IT Operations | User Lifecycle Management | SAP Business One | UAT | Technical Documentation | Python | PHP | SQL | AWS | Google Cloud | Docker | Kubernetes | Power BI

PROFESSIONAL EXPERIENCE

Cybersecurity & GRC Intern | KPMG Türkiye | Jul 2025 - Sep 2025

- Analyzed segregation-of-duties and incompatible-role conflicts to support IAM and GRC assessments.
- Mapped security and compliance findings to TISAX and ISA 6.0 controls and prepared stakeholder-ready documentation and presentations.

IT Management Trainee | Ramco Group | Dec 2021 - Sep 2023

- Administered SAP Business One user accounts, roles and permissions while supporting onboarding, offboarding and day-to-day application issues.
- Coordinated UAT, maintained operational procedures and improved recurring reporting workflows using SQL, Power BI and automation.
- Supported access governance, business-process improvement and clear documentation for enterprise IT operations.

Junior Software Developer | Reeve Technologies Limited | Jul 2020 - Dec 2021

- Translated business requirements into database-backed applications and supported development, testing and UAT through delivery.
- Created technical documentation and delivered knowledge-transfer sessions for users and junior team members.

Information Technology Specialist Intern | Safaricom PLC | Jan 2020 - Apr 2020

- Resolved end-user technology requests through structured service-desk workflows and supported reliable enterprise IT operations.

SELECTED PROJECTS

Policy-as-Code Segregation of Duties Enforcement | Applied Cybersecurity Thesis

Designed and evaluated a hybrid-cloud SoD enforcement architecture across 1,000 identities and 500 labelled scenarios. Detected all 400 ground-truth conflicts with precision, recall and F1 of 1.0000 and a mean policy evaluation time of 0.00371 ms. Control context included DORA, EBA/GL/2019/04 and NIST SP 800-53 AC-5.

Reference Letter Submission System | Secure Web Application

Built a CodeIgniter 3 and MySQL application with tokenized referee access, controlled document uploads, submission tracking and an administrative review dashboard.

EDUCATION

Master of Science, Applied Cybersecurity | SRH Berlin University of Applied Sciences | 2026

CyberMACS Erasmus Mundus Joint Master's Programme

Bachelor of Technology, Business Information Technology | Strathmore University | 2020

First Class Honours

CERTIFICATIONS

Cisco Certified Network Associate | AWS Cloud Practitioner Essentials | DevSecOps and Web Application Testing
